

Force Protection Video Receives FCC, IC AND CE Certification for the LE50 Camera Systems

September 15, 2016

CARY, NC, September 15, 2016 Force Protection Video Equipment (OTC Markets: "FPVD") is pleased to announce that it has received FCC, IC and CE certification for the LE 50 HD on the body video recorder.

The FCC certification part 15 is a requirement that shows that the design of the LE50 meets strict guidelines required for electronics to legally operate in the United States. Likewise, the IC certification is for Canada and the CE is for the European Union including Great Britain. These certifications are needed to assure that Force Protection Video will be able to participate in marketing the LE50 worldwide. Many of our competitors do not have these certifications. All cameras and electronics that Force Protection offers for sale are in conformity to these standards. Our cameras are state of the art designs using the Ambarella chip design, the added FCC, IC and Ce certifications help insure potential customers of the quality of our products. The added cost we absorbed in obtaining these certifications evidence our commitment to providing quality products that are accepted worldwide "said Paul Feldman CEO.

The Force Protection Video LE10 and LE50 cameras are rugged HD design which incorporates Ambarella (NASDAQ AMBA) made chips that allow cameras and other devices to record high definition video. It is the chip supplier of the popular GoPro® (NASDAQ:GPRO) sports cameras.
