Business Wire

CARY, N.C. -- September 17, 2015

Force Protection Video Equipment (OTC Markets: FPVD), which sells HD body camera systems and accessories for law enforcement, announced that the LE10 on
the body camera has been chosen over several other manufactures in a 30 day test and evaluation by a Northern California Police Department. The key
positive feedback comments from the Department were size, video quality and pricing.

Force Protection has also received multiple reorders from Police Departments in Tennessee and District Attorneys’ Offices in Louisiana.

The LE10 is a small bodyworn high definition (HD) camera which is half the size and half the price ($195.00) of most law enforcement cameras currently
available. The LE10 is rich with features such as still picture ability 8MP, WIFI, 4x zoom and audio recording. The LE10 does not require special software
or expensive storage contracts. The video files can quickly be downloaded into a standard law enforcement case file and the micro SD cards are sealed in the
provided static evidence bags and then securely stored in the department’s evidence locker.

The Force Protection Video LE10 camera is a rugged HD design which incorporates Ambarella (NASDAQ AMBA) made chips that allow cameras and other
devices to record high definition video. It is the chip supplier of the popular GoPro (NASDAQ:GPRO) sports cameras.
