# Force Protection Video Receives Multiple Orders for the LE10 on the Body Camera Systems

March 23, 2016 01:08 PM Eastern Daylight Time

CARY, N.C.–(BUSINESS WIRE)–Force Protection Video Equipment (OTC Markets: “FPVD” ) which sells HD body camera systems and accessories for law enforcement announced that it has received multiple orders for the LE10 camera and accessories. The LE10 on the body camera has been chosen over several other manufactures based on price and accessories. The departments are located in a major ski resort town in New Mexico and police departments located in Louisiana, Texas and North Carolina.

Federal and state funding for body-cameras has slowly becoming available, we are currently seeing a rise in purchases for not only our cameras but our accessories which other camera companies do not offer.

The LE10 is a small bodyworn high definition (HD) camera which is half the size and half the price ($195.00) of most law enforcement cameras currently available. The LE10 is rich with features such as still picture ability 8MP, WIFI, 4x zoom and audio recording. The LE10 does not require special software or expensive storage contracts. The video files can quickly be downloaded into a standard Law enforcement case file and the micro SD cards are sealed in the provided static evidence bags and then securely stored in the department’s evidence locker.

The Force Protection Video LE10 camera is a rugged HD design which incorporates Ambarella (NASDAQ AMBA) made chips that allow cameras and other devices to record high definition video. It is the chip supplier of the popular GoPro (NASDAQ:GPRO) sports cameras.
